

Market For

Imports Millions But

Only Small Percentage From Canada

and rubber tires. The United States imports annually about 5.5 million eggs. Out of every 1,000 utilized in 1925, 540 were of the origin, distributed thus: 483 in the United Kingdom; 85 in the Irish Free State; 4 each in Canada and South Africa, and 3 in Australia. It is plain that there is a market in that country for more

an egg, especially as out of foreign origin 133 came from. We turn up our noses at Chinese, especially when they come to work, and in time the British people should be educated to do the same. The share of the Empire overseas supply of eggs and poultry to the United Kingdom is but small compared with the imports from foreign countries. About 20 per cent of the

of eggs and 81 per cent. of poultry come from the Irish state, but all the other parts of empire contribute only 3 per cent. of poultry. "It is therefore," says the committee, "that is room for voluntary preference in favor of Empire eggs and poultry." Moreover the rate of consumption of eggs per head of popula-

g Ready To
Plant Strawberries

on Should Be Carried Out
Early In the Spring

a strawberries are planted in
ring the operation should be

out just as soon as the soil is enough to work. The later it is left, the less are the chances of success. In a bulletin on "Cultivation Of the Strawberry," issued by the Publications Branch, Department of Agriculture, Ottawa, the necessity of having the soil in good condition before commencing planting is emphasized. After the seed and levelling harrows have been

over light loamy soils it will be sufficient to roll the land before sowing, but if the soil is at all too lumpy, it is a good practice to go over it with a planker before sowing. Too much stress cannot be put on the importance of preventing the crowding out of the roots before sowing. The strawberry plants are very subject to heating and if left in the sun for a few days the roots

For a few days the roots may die from this cause. If received, the plants should be watered up and if the roots are dry should be well soaked with water before heeling in until they are planted. When the plants are taken to the field they should be exposed to the sun as little as possible and watered promptly.

Newspaper Advertising
 Harold Mackintosh, of the to-
 day, declared at the dinner of
 the Incorporated Society of British
 Advertisers Ltd.; "A business is
 made by its advertising, and if there
 is anything in which it is important
 to earn it is in advertising.
 Advertising is a necessary ingredient, so
 that you get the public laughing
 at you and not at you I always

that the press is the best
publicity."

THURSDAY, MARCH 29, 1928
A TOWN'S BEST BOOSTER
 A writer in current magazine
 observes "If the newspaper is just
 a little better than the town, the
 town is the greater thereby."

Those and their newspapers
 usually lag behind the town.
 Progressive journalism is the
 foundation of the leadership
 of the leadership community.
 The newspaper can seriously retard
 the development of its community.

There is no better community
 than the one in which the newspaper
 is the need of the community.
 With a poor newspaper is better
 than if the newspaper is the town,
 that does not hold true for the
 town.

What can a good newspaper do
 for its community? It can serve
 as the town's messenger to the
 outside world. It must take the
 leadership in all community
 projects if it is to be a leader.

It is the inalienable right of
 communication between local government
 and citizen. It is the newspaper
 that all executives turn to for
 assistance in public welfare
 matters and without that assistance
 they are lost.

The newspaper reaps the reward
 of its initiative by playing in the
 general improvement of business
 and its readers and is fully aware
 that it is only through giving a
 full measure of service that it can
 prosper and prosper.

Local and District
 Mrs. V. J. Simpson and children
 are visiting in Delia, Saskatchewan.

Stan. Walker, of the Queen's
 Hotel, was a business visitor to
 Calgary the latter part of last week.

Many British Settlers Expected
 A large number of British settlers
 will be coming to Alberta during
 the next three months, says E. M.
 Johnson, superintendent of the
 Land Settlement Board at Edmonton.
 Those who are settling are
 expected from the training schools
 established by the British Ministry
 of Agriculture in various parts
 of England and Scotland, where
 young men are given a six months
 course of training on farms equipped
 with Canadian machinery and implements.
 In addition a considerable
 number of married couples will
 act as single men and women
 settled in farm homes and
 domestic are included in the emigrants
 from Great Britain destined for
 this province.

P. Williams was a visitor to
 Calgary on Sunday, returning home
 day night.

The Women's Institute will hold
 a sale of Home Baking and a
 Crosse Tea on Saturday afternoon,
 March 31st, in the Red Room,
 at 1 o'clock—adv.

There will be a meeting of the
 Junior Institute in the annex of the
 Church Saturday, March 24th, at
 3 p.m.

Mrs. Mary Morrison left on Friday
 morning's train for Medicine Hat
 on route to Medicine, on a visit to
 friends.

Mrs. M. K. Doyle, who has been
 specializing for Mrs. Gals Schiele in
 the Drummehill Hospital, has returned
 to Medicine.

Win. Adams, seven miles north-
 west of town, shipped a mixed
 cargo of stock to Calgary on
 Tuesday night.

R. C. Coad, Minneapolis tractor
 agent, left on Tuesday for Calgary
 to attend the tractor school being
 held there from 21st to 24th inst.

Wm. Gilson, J. H. C. Co., Montreal
 received a carload of 10,000 McCormick
 Deering tractors from the Chicago
 factory on Monday.

Canadian Legion monthly meet-
 ing and smoking Friday, March 23rd,
 8:30 p.m. Smoke open to all
 veterans and their invited friends
 only.

Mr. and Mrs. C. P. Phillips were
 visitors to Calgary the latter part
 of last week. Mr. C. P. Phillips
 of Medicine, took care of the children
 during their absence.

Mr. and Mrs. G. O. Bolter and
 daughter left on Tuesday morning's
 train for Calgary. While there Mr.
 Bolter will be delegate for Lambton
 Municipal Council on the annual
 meeting of the Hall Insurance
 Society, to be held Wednesday and
 Thursday.

Shortly before noon on Saturday
 morning a carload of dry corn was
 produced and shipped in a clean
 way, in particular to kill any
 disease germ, is kept cold and covered
 until used.

Is this the kind of milk you and
 your children use?

Questioning Canadian Health, all
 directed to the Canadian Milk
 Association, 184 College Street, Tor-
 onto, will be answered. Question
 by mail, and restaurant will not
 be answered.

1927 Coal Production
Sets New Record
 Alberta production of coal during
 1927 has established a new high
 mark for the province.

According to the report of the Mines
 Branch, presented to the Legislature
 during the past week, the total
 amount of coal for 1927 was 6,696,
 780 tons, which is 27,875 tons
 greater than the previous record
 year, 1926, when 6,668,905 tons
 were produced. The 1927 production
 exceeds that of 1926 by 47,
 875 tons.

The total number of miners in
 operation at December 31st, 1927,
 was 259. There were 325 miners in
 operation during the year, and of
 these 22 were injured, 22 re-injured
 63 abandoned.

There were 11,639 persons em-
 ployed in Alberta coal mines during
 the month of December, 1927, which
 was an increase of 274 over the
 number employed during the cor-
 responding month of 1926.

Of the 1927 production, which
 reached approximately seven million
 tons, 1,508,089 tons were sold
 for consumption in Alberta, 560,154
 tons for other provinces and
 46,160 tons for consumption in the
 United States, 2,769,765 tons were
 sold for other provinces, 10,046
 tons were used in making fertilizer,
 287 tons for coke, 248,565 tons in
 colliery boilers, 8,864 tons by col-
 liery for steam, 160 tons were
 put to stock, and 105,974 tons were
 put on the waste heap.

Livestock Union Meeting in
Edmonton Next Year
 The 1929 annual convention of
 the Western Canada Livestock
 Union, will be held in Edmonton,
 it was decided at the recent annual
 of this gathering, which was held in
 Vancouver, B. C., in December, 1927.
 Saskatchewan, has been re-
 elected secretary of the organization
 for the coming year, J. L. Walters
 of Crows, is the provincial presi-
 dent for Alberta; O. J. Lafleur,
 of Manitoba, occupies the same position
 for Saskatchewan, and George
 Jordan of Olds, Alberta, for Manitoba.
 C. M. Lawrence, of Regina, con-
 tinues as secretary of the union for
 1928.

Good Friday this year, April 6th.

Health Service of the Canadian Medical Association

MILK and TUBERCULOSIS
 The value of milk is not limited
 to the first year of life. As the
 child grows, he needs to enlarge his
 diet, but his confidence in the milk
 is the most important element in this
 diet during the years of growth. Every
 child should have one pint of milk
 a day to insure the necessary sub-
 stance for the body.

Young children have very little
 resistance to tuberculosis. Three
 out of four of the children born in
 two members of the same family as
 they were, which cause tuberculosis in
 children—the human and bovine
 types. As the greater number of
 cases are caused by the human
 type. The bovine type is responsible
 for about 25% of all tubercu-
 losis occurring amongst children.

In children, tuberculosis often at-
 tacks the bones and joints, and is
 so responsible for much crippling
 and deformity.

The bovine type of tuberculosis
 is the long grass of the dairy
 from tuberculosis, and reaches
 the child through milk. As a large
 percentage of the children born in
 tuberculosis, it follows that a large
 percentage of milk is infected with
 the bovine type of tuberculosis germ
 unless the necessary precautions are taken,
 milk is a real factor in the spread
 of tuberculosis to young children.

It is the duty of every Canadian
 tuberculosis or towards the im-
 provement of child health to see
 that the milk supply is safe and
 clean.

High Value of Alberta Farm Lands
 Alberta farm lands in occupation
 in 1927 are valued at an average of
 \$28 per acre as compared with \$26
 per acre in 1926, according to the
 Dominion Government Crop Report
 issued from Ottawa on February
 24th. This valuation includes both
 improved and unimproved lands,
 as well as dwelling houses, and
 farm buildings. This report gives
 an average for all of Canada as \$38
 per acre as compared with \$37 in
 1926, and \$38 in 1925. The 1927
 figures for the other provinces are
 given as follows: British Columbia,
 \$55; Ontario, \$45; Quebec, \$41;
 Prince Edward Island, \$41; New
 Brunswick, \$37; New Brunswick, \$30;
 Nova Scotia, \$27; and Saskatchewan,
 \$25.

BIGGER AND BETTER
CHEVROLET
 CHEVROLET's association with General Motors
 has given the "Bigger and Better" Chevrolet
 the advantage of the largest automotive research
 laboratory in the world, — the largest automotive
 proving ground in the world and the world's
 craftsmanship of Fisher bodies.

NEW AND LOWER PRICES
 Because of the economies of enormous production
 because all resources and strength of General Motors are back of Chevrolet
 in this new undertaking, the most outstanding
 value in the low-priced field.

The G.M.C. Co., General Motors, now deliver
 complete Chevrolet cars, trucks and commercial
 vehicles of any kind at the lowest possible
 price of buying your Chevrolet on time.
